SUMMARY

Civil Engineer specialized in Hydrotechnics with experience in water supply and sewer system design, as well as hydraulic modeling and infrastructure projects. Strong in data analysis and problem-solving, with the ability to develop efficient and practical engineering solutions. Also skilled in front-end development, combining engineering knowledge with technology to deliver modern, real-world applications.

PROFESSIONAL EXPERIENCE

Hydrotechnical Engineer

AL Engineering shpk

Water supply system design, sanitary and stormwater sewer design, river design and flood modeling, plumbing design, local roads and parking lot design

2020 – Present
Prishtinë

Regional Water Supply Company

Hidroregjioni Jugor

Monitor the performance of the water supply system to ensure reliable service, identify, diagnose, and resolve hydraulic issues such as leaks, pressure drops, or blockages.

2017 – 2020
Malishevë

PROJECTS

- River engineering of Krena and Llukac river in municipality of Gjakova
- Design of parking lot for Family Medicine Center of Gjakova
- Water supply system design for the road "Tirana", of Gjakova
- Sanitary sewer design for the Rrezine's neighborhood of Gjakova.
- Stormwater sewer design for the road that connects municipality of Gjakova to municipality of Deçan

EDUCATION

Web Developer

ROI Academy

Completed professional training in web development, covering HTML, CSS, JavaScript, MySQL, and React.js. Acquired practical skills in responsive web design, front-end development, database management, and the development of dynamic web applications.

2023 – 2024
Prishtinë

Master of Science in Hydrotechnical Engineering

The University of Prishtina

During my master's studies, I specialized in hydraulic engineering, water resources management, hydrology, and the design of water infrastructure systems.

2018 – 2022
Prishtinë

Bachelor in Hydrotechnical Engineering

University of Prishtina

The bachelor's program provided a comprehensive foundation in civil engineering, covering structural, geotechnical, transportation, and hydraulic engineering.

2014 – 2018
Prishtinë

SKILLS

Civil engineering

- Hydraulic modelling
- River engineering
- Drainage design
- Flood risk assessment
- Water supply systems design
- Hydrologic analysis
- Sanitary sewer design
- Road and parking lot design

Software

- AutoCAD
- Civil 3D
- HEC-RAS
- HEC-HMS
- Aquaterra
- Plateia
- Archicad
- Microsoft Office

Programming & Web Development

- HTML5
- CSS
- JavaScript
- Bootstrap 5
- MySQL
- React Js

LANGUAGES

- Albanian
- English

DRIVING LICENCE

Licence B
